## CALL FOR EVALUATORS OF FELLOWS' APPLICATIONS

**Evaluator activities: paid**

**Evaluators also act as NGI Transatlantic Ambassadors (activities non-paid)**

### ESSENCE OF THE CALL

NGI Enrichers is Next Generation Internet Transatlantic Fellowship Programme (Sept 2022 – August 2025). More information about NGI Enrichers is provided [here](#).

**NGI Enrichers is seeking to engage a multidisciplinary pool of experts to evaluate applications from potential fellows** from Europe, human-centric internet researchers and innovators, who – if selected – will be hosted by US and Canadian universities, research centres, or private firms, to develop NGI solutions, services, and standards jointly.

Up to 20 evaluators throughout the duration of NGI Enrichers will be selected to assess potential fellows' applications, to be submitted to different tracks (paired teams, open ideas, challenges).

### We are looking for:

[enrichers.ngi.eu](https://enrichers.ngi.eu)

The NGI Enrichers project has received funding from the European Union's Horizon Europe Research and Innovation Programme under grant agreement 101070125.

European (EU nationals as well as nationals of Horizon Europe associated countries, full list [here](#)), US, and Canadian specialists – scientific (technical and social sciences) or business experts: university or industry researcher or engineer, staff of other relevant organisations e.g. clusters, accelerators, etc. motivated by NGI challenges.

**SCIENTIFIC - TECHNICAL EXPERTS** with sound scientific/technical/engineering background and experience working and developing state-of-the-art tools and wide expertise in the NGI Focus Areas (see below), preferably integrated into the NGI related networks in Europe, USA or/and Canada, and capable of evaluating scientific merits of the applications.

Preferably to have a PhD degree in NGI related background: computing sciences, engineering, telecommunications.

**SCIENTIFIC - SOCIAL SCIENCES EXPERTS** (experts from social science and the humanities) who bear competencies to evaluate Next Generation Internet-related proposals in technology fields are encouraged to submit their application to become an evaluator.

Preferably to have a PhD degree in social science and the humanities: sociology, anthropology, environment, politics, or design.

**BUSINESS EXPERTS** with a solid trajectory in entrepreneurship, business development, and startup creation. Business angels, investors or relevant clusters, business accelerators and incubators, IEEE, legal experts, and mentors... in the corporate world are welcome to apply.

**To apply as an evaluator, you must create an F6S profile and fill in this F6S [online form](#) (please upload your CV via the form)**

The application form shouldn't take you more than 15 minutes!

Call opening: 4 November 2022 (Brussels time)

Call closing: 15 December 2022, 23h59 (Brussels time)

## EVALUATORS' ROLE

The evaluators will be in charge of **providing a neutral yet scientific and/or business review of fellows' applications** on the following aspects:

- Excellence of the candidate
- Quality of the project
- Impact of the idea: proposed project

The full evaluation criteria for applications of potential fellows can be found [here](#).

The evaluation process of one application of a potential fellow takes 45-60 minutes, including filling short summary of the evaluation. Thus, approx. 7 applications are expected to be evaluated during one working day.

**The evaluators cannot apply to NGI Enrichers calls to become fellows.**

## BENEFITS

### FINANCIAL BENEFITS

Evaluators will receive a compensation of 400 euros per working day for the assessment of 7-8 applications (45-60 min each, including writing a short summary of the evaluation) and 200 eur per half-working day. The minimum and the maximum number of days per evaluator will depend on the number of applications received, and other factors such availability of the evaluator throughout the project etc.

### OTHER BENEFITS

By engaging in this role, evaluators will become NGI Transatlantic Ambassadors and, thus part of the NGI Transatlantic community. They will:

- Contribute to an impact on EU innovation, EU competitiveness and contribute to selecting the unicorn of tomorrow.

- Make contribution/influence the topics (both technical and business related) of the upcoming events of NGI Enrichers, including physical bootcamps
- Have free access to the virtual bootcamps, available only for NGI Enrichers fellows, provided by top-notch European, USA and Canadian specialists. This includes business training, IP, and public and private fundraising training.
- Have the opportunity to take part in NGI Enrichers webinars and other events, with a visible role
- Contribute to the creation of synergies with other programmes and initiatives, including contribution to the shaping of a pilot action under NGI Enrichers: mirrored visits of the hosts to European fellows (with external funding).
- Have their profile published in the section “NGI Transatlantic Ambassadors” on the website of NGI Enrichers (there will be no indication whether the specialist was/is an evaluator or not).

**The depth of involvement in these activities will depend on the willingness of the specialists and their availability.**
