Consortium

The NGI Boardgame

Felix Szabó – ENGINEERROOM, Nesta

Agenda

1. Simulation & Games
2. The NGI Game
3. What we want to do today

CONSORTIUM

Games for policy

- Thinking in new ways
- Stepping into somebody else's shoes
- Direct use by policymakers
- Example: Innovate! by Nesta and Digital Liberties

Use a boardgame to:

- Demonstrate the trade-offs we face when shaping the internet
- Gather input on players opinions
- Show the need for cooperation between stakeholders

The idea:
Address NGI
challenges with a
game

Game mechanics

- 5 values

Components – The Cards

Flexible Work

Created by Nicolas Vincent from Nease Project

-1

3

1

Businesses to allow shifting hours, work from home and supplying technology to make it easier and convenient. Easiest of course for larger firms.

Public Transport WiFi

Created by David Probin from Nease Project

-1

1

2

Massive effort to put Wifi on every public transport in the 50 biggest cities in Europe. Only possible thanks to our generous industry partners.

Government EdTech

Created by Kevin Augustine LO from Nease Project

2

-1

1

To protect children from data harvesting and add profiling, whilst preparing them for a tech heavy world, the government provides tablets and other devices through schools.

AI Health Service

Created by Kikula from Nease Project

-1

3

1

Partnership to improve diagnostics by analysing data from all patients across the board, anonymised and aggregated.

Visit our table after and stay in touch
for more via our website and
newsletter.

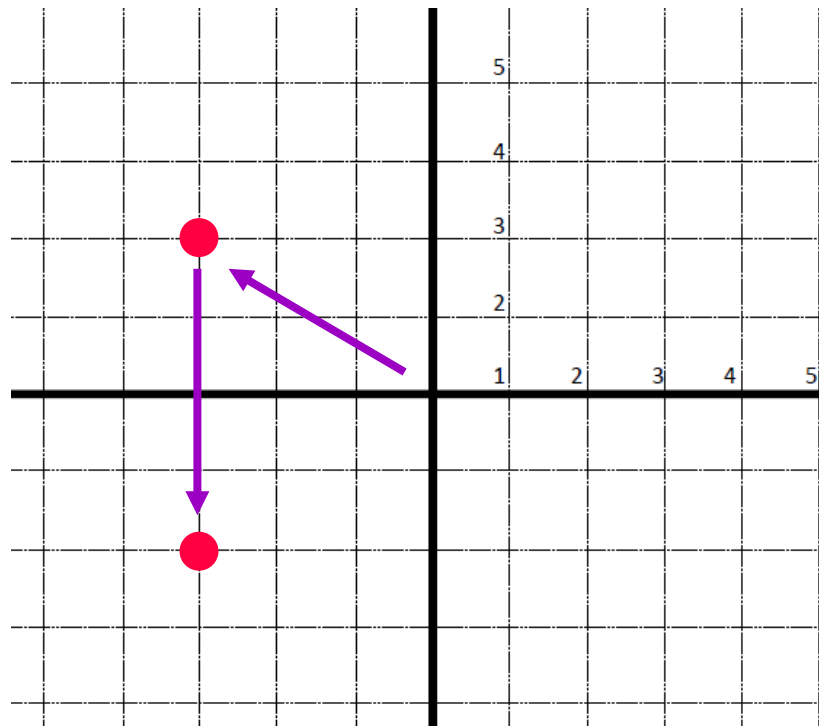

Today!

- Place yourselves on the board

Today!

- Place yourselves on the board
- **Six scenarios** with two options
 - In groups, discuss and pick an option
 - Please write down your thoughts!
 - “Move” across the board
- Now: Introduce yourselves and start remaking the internet!
